Diagnosis report

After a thorough evaluation of the provided medical records, clinical assessments, and diagnostic test results, the findings indicate the presence of **HIV (Human Immunodeficiency Virus)** in the patient.

Diagnosis Details:

- **Diagnosis:** HIV Infection
- **Stage:** Acute/Chronic
- **Viral Load:** Detected in blood test
- **CD4 Count:** CD4 cell count level
- **Additional Findings:** Opportunistic infections

Recommended Next Steps:

- Further consultations with Infectious Disease Specialist / HIV Specialist
- Additional diagnostic tests: Viral Load Testing, CD4 Count Monitoring, Drug Resistance Testing
- Treatment options: Antiretroviral Therapy (ART), Preventive Medications
- Lifestyle & dietary recommendations: Healthy nutrition, regular exercise, mental health support

Doctor's Recommendation : Consider lifestyle modifications, regular exercise, and periodic monitoring.
